### PROFILE

A skilled **mobile developer** with a strong specialization in **Flutter** and **Dart**, proficient in building high-quality, cross-platform applications for Android and iOS. With a focus on intuitive design, responsive interfaces, and efficient state management, I aim to create seamless user experiences. My expertise includes integrating backend services like Firebase, implementing real-time features, and optimizing applications for performance and scalability. I am passionate about leveraging technology to solve problems and deliver innovative solutions that meet user needs.

### EDUCATION

- |             |                                                                                                                                   |

### PROFESSIONAL EXPERIENCE

#### OCTAVE INCORPORATIONS

*Software Developer*

- **Developed and launched the company's website**, significantly enhancing its online presence and boosting service patronage by up to **70%**.
- **Collaborated on the development of Melody AI**, an innovative service app designed to address complex questions faced by medium and small-sized businesses. The app automates cash flow management, tracks progress, and aids in making data-driven financial decisions. Currently in **beta testing**, it is poised to help businesses scale effectively.

#### PAVILLION BOOKINGS

*mobile developer - intern*

- **Contributed to User Interface Development:** Played a key role in implementing intuitive and responsive user interfaces, ensuring seamless user experiences across multiple platforms.
- **Assisted in Writing Testable Code:** Collaborated with the development team to write clean, maintainable, and testable code, improving the overall quality and reliability of the application.

- **Supported Debugging and Troubleshooting:** Identified and resolved software bugs, enhancing application performance and functionality during the development lifecycle.
- **Participated in Code Reviews and Team Collaboration:** Actively engaged in code review sessions, learning best practices and improving team collaboration skills to deliver high-quality software solutions.

**AfriBeta - Customer app**

*mobile developer [Per-term gig]*

- Contributed to the development of a feature-rich banking and wallet application, currently live on the Play Store, offering banking services, bill payment, airtime recharge, and seamless money transfers.
- Led the design and implementation of the authentication flow, ensuring robust security and a smooth user login and registration process.
- Developed and optimized the wallet flow, enabling efficient wallet management, transaction tracking, and integration with payment gateways.
- Collaborated with a multidisciplinary team to deliver a scalable and user-centric application within tight deadlines.
- Ensured high performance and reliability by integrating best practices in Flutter development and conducting rigorous testing.

**PERSONAL PROJECTS**

**Gluttonnie**

- **Developed a Food Recipe App (Gluttonie):** Designed and built a feature-rich recipe app with **6 distinct categories**, each containing a variety of food sections. Each food item showcases multiple detailed recipes, offering users a comprehensive culinary experience.
- **Implemented State Management with Riverpod:** Leveraged **Riverpod** for efficient state management, ensuring consistency and seamless data flow across various sections of the app, enhancing usability and performance.

**Let's chat**

- **Built a Chat Application:** Developed a real-time chat app, enabling seamless communication between users with a focus on reliability and scalability.
- **Integrated Firebase Authentication:** Implemented **Firebase Authentication** to manage secure user sign-ups and logins, ensuring data privacy and secure access.
- **Implemented Firebase Cloud Messaging:** Integrated **Firebase Notifications** to deliver real-time message alerts and updates, enhancing user engagement.

- **Utilized Firebase Storage:** Leveraged **Firebase Storage** to enable users to upload and share multimedia files, such as images and videos, within chat conversations.
- **Designed Intuitive User Interfaces:** Created user-friendly and responsive interfaces for smooth navigation and enhanced user experience across devices.
- **Optimized State Management:** Ensured seamless functionality and data synchronization across screens by employing efficient state management practices.

#### Find-me app

- **Developed Find-Me App:** Created a scalable and interactive app that allows authenticated users to share their location in real-time, upload pictures, and share live updates with other users.
- **Integrated Google Maps Services:** Seamlessly incorporated **Google Maps API** to enable users to pin and share their precise addresses, providing accurate geolocation and navigation features.
- **Implemented Real-Time Updates:** Enabled live sharing of user details and updates, ensuring a dynamic and engaging experience for users.
- **Designed User-Friendly Interfaces:** Developed intuitive and responsive interfaces for location sharing and image uploads, ensuring smooth interactions across various devices.
- **Optimized for Scalability:** Architected the app for scalability to handle a growing user base while maintaining high performance and reliability.
- **Focused on Secure Authentication:** Implemented secure user authentication to protect data and ensure that only authorized users can access and share content.
